

CHAITNAYA SHARMA

Software Developer | Java Backend Engineer | Spring Boot

chaitanyasharma360@gmail.com | 9934340276 | github.com/Chaitanya0110 | leetcode.com/u/Chaitanya0110
Mandawali, Delhi

PROFESSIONAL SUMMARY

Full-Stack Software Engineer skilled in building scalable backends (Java, Spring Boot) and dynamic frontends (React, Redux). Adept at designing secure microservices and cloud-native solutions to craft seamless user experiences.

EDUCATION

University School of Automation and Robotics (GGSIPU), Delhi Industrial Internet of Things, B.Tech	2023 – 2027
Model School Dalmianagar, Dehri-on-Sone High School (PCM)	2019 – 2021

EXPERIENCE

Frontend Development Intern Remote	IBM SkillsBuild (CSRBOX) Jul 2025 – Aug 2025
- Developed "GreenCart," a responsive e-commerce and sustainability awareness platform using HTML5, CSS3, and JavaScript (ES6). - Engineered a real-time "Impact Calculator" using DOM manipulation to quantify environmental benefits (CO₂ and plastic reduction) based on user selections. - Optimized application performance via lazy loading and minification, while ensuring cross-browser compatibility and WCAG compliance.	

PROJECTS

Full-Stack E-commerce Platform	Spring Boot, React, Redux, PostgreSQL, AWS
- Constructed a comprehensive e-commerce application featuring a responsive React and Redux frontend, coupled with a secure Spring Boot REST API backend. - Implemented robust authentication and Role-Based Access Control (RBAC) using Spring Security and JSON Web Tokens (JWT), creating dedicated and secure Admin, Seller, and User panels. - Designed and optimized relational database schemas utilizing PostgreSQL and JPA/Hibernate to efficiently manage products, complex shopping cart states, orders, and user profiles. - Integrated Stripe for secure payment processing and deployed the production-ready application to AWS, utilizing Spring Boot Profiles for advanced environment management.	
Interactive RPG Game Portfolio	React, Phaser 3, Vite, JavaScript
- Architected a hybrid, gamified portfolio experience by integrating a React frontend with the Phaser 3 game engine within a Vite development environment. - Modular game logic programmed with entity-based elements that features interactive zones that seamlessly trigger dynamic React UI components and JSON-driven resume overlays. - Enhanced user engagement with custom cinematic camera introduction, interactive NPCs, and typewriter text effects to create a highly unique presentation of professional details.	
AI-Powered Audio Transcription System	Spring Boot, React, OpenAI Whisper
- Created a full-stack transcription platform using Spring Boot (Spring AI) and React for seamless audio uploads and speech-to-text conversion. - Built a backend transcription pipeline with temporary file handling, Whisper configuration, and secure API key integration. - Designed a responsive React interface using Axios, custom components, and instant rendering of AI-generated transcripts. - Architected robust REST APIs with CORS policies, structured error handling, and multipart form-data support.	

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS
Frameworks: Spring Boot, React, Redux, Tailwind CSS
Tools & Platforms: Maven, Git, GitHub, Docker, Linux, Postman, AWS
Core Concepts: DSA, OOP, DBMS, OS, REST APIs, Microservices, Cloud Fundamentals
Soft Skills: Problem-Solving, Team Collaboration, Communication

CERTIFICATIONS

Java Course	Sep 2025 Tutedude (Credential ID: TD-CHAI-JA-2108)
Web Development Fundamentals	Jul 2025 IBM SkillsBuild (Credential: Credly)
